EXPERIENCE

Cloud Application Development Student

MICROSOFT SOFTWARE AND SYSTEMS ACADEMY (MSSA)

Jan 2021 - Present

Studied the software development lifecycle and how to use it to successfully develop various console-based and graphical applications using C# and Microsoft Visual Studio 2019.

- o Used T-SQL to create, retrieve, update, and delete data inside of databases using Microsoft SQL Server Management Studio 2019.
- o Completed 360 classroom hours learning and mastering the fundamentals of C#, T-SQL, ASP.Net MVC, and Azure.
- o Used ASP.Net MVC as well as HTML and CSS to create multiple web-based applications.

11C- Indirect-Fire Infantryman

United States Army

January 2017 – Current

Supervised a six-member team. Coached and mentored over twenty individuals to attain qualification in assigned positions. Served as a standardization specialist to improve current processes, develop standard operating procedures, and adapt appropriately to the consistently changing needs of the Army.

- o Managed risk upon multiple lines to protect assets, property and equipment valued over $750,000; with zero loss.
- o Streamlined communication between supervisors, leadership, and personnel; successfully decreasing operational errors by 80%.
- o Achieved 90% compliance through implementation of effective conflict resolution methods, providing operational guidance, and adapting to unprecedented challenges.
- o Successfully trained, supervised, and instructed joint foreign military training, while deployed in Afghanistan and Iraq.
